FALCON GROUP

BACKGROUND

Founded in 2007, Erbil-based Falcon Construction provides a wide-array of construction contracting services – from planning, design, engineering, and new builds to road works, civil works, as well as renovation and restoration of existing structures. Falcon Construction is a world-class construction contracting company and a central member of the Iraqi-owned Falcon Group conglomerate.

Falcon Construction has built a stellar reputation for delivering superior services on-time and at competitive prices. As a major player in Iraq’s construction industry, the company builds and creates, with a focus on the development of Iraq while delivering precision and highest levels of quality.

With its team of full-time engineers, architects, and specialists, Falcon Construction works from initial concept projects to the whole life management, providing a customized experience in support of its clients.

Falcon Construction currently has a large in-house resource base in Iraq and throughout the region, well positioned to deliver overnight consulting services when required. No matter how challenging a project or wherever it’s located in the region, Falcon Construction will produce the finest products and improve the quality of life for communities and people.

Drawing from over 50 years of technical expertise, Falcon Construction’s management team is committed to executing the work with a full commitment to health, safety, and environmental standards, as well as quality control throughout every phase of the project.

Falcon Construction offers the best value in the successful completion of all contract requirements for these vital services, as the company regularly demonstrates through a complete

technical execution plan illustrating the team’s approach for a project and thorough understanding of the client’s requirements.

Falcon Construction has a proven history of completing its assigned tasks in accordance with all contract requirements by applying a technical approach with the following:

- 1) experienced management
- 2) proven performers
- 3) constant situational awareness through intelligence and communications
- 4) safe and proven standard operating procedures
- 5) well-controlled operations
- 6) clearly defined operational roles and responsibilities.

Falcon Construction has comprehensive experience in Iraq and throughout the region, giving it the know-how to support each client’s specific performance requirements, local culture, laws, and wider international conventions. Falcon Construction’s most valuable deliverable is its promise to complete the project in the safest, most efficient manner with the highest quality possible. Falcon Construction’s ability to coordinate directly with clients, its reliability in harsh conditions, and its flexibility with regard to changing requirements continues to attract clients who are committed to meeting stakeholder objectives.

FALCON CONSTRUCTION	
Falcon Construction’s expertise in civil works throughout Iraq enables the company to offer a comprehensive approach to contracting projects.	
Strength	Value
Large, existing presence in Iraq and throughout the region	Immediate mobilization capability
Proven construction and site improvement experience in Iraq	Low-risk solution due to existing labor, policies, procedures, and similar experience
Existing and recent contracts to provide engineering and construction works	Immediate equipment availability, experience supporting “clean up” efforts
Understanding of complexities associated with deconstruction activities	Experience and understanding of regulatory requirements and processes for processing and removing demo materials IAW Iraqi law
Fully Licensed and Insured	Fast phase-in, easily able to coordinate workforce and equipment to and from the site

PHILOSOPHY

As a member of Falcon Group, Falcon Construction is committed to upholding to mission, vision, and pledge of the Group and all member companies.

Mission

The mission of the Falcon Construction is to become an icon of corporate responsibility and success in Iraq. We accomplish this goal by instituting positive and progressive management models in our businesses, recruiting Iraqi nationals whenever possible, training and mentoring them for the workplace of tomorrow, and by complimenting the national workforce with skilled international professionals in disciplines that require such expertise.

Vision

Falcon Construction envisions a robust Iraqi economy that supports the nation's ability to manage growth and plan for the future. We see ourselves as part of this vision.

Pledge

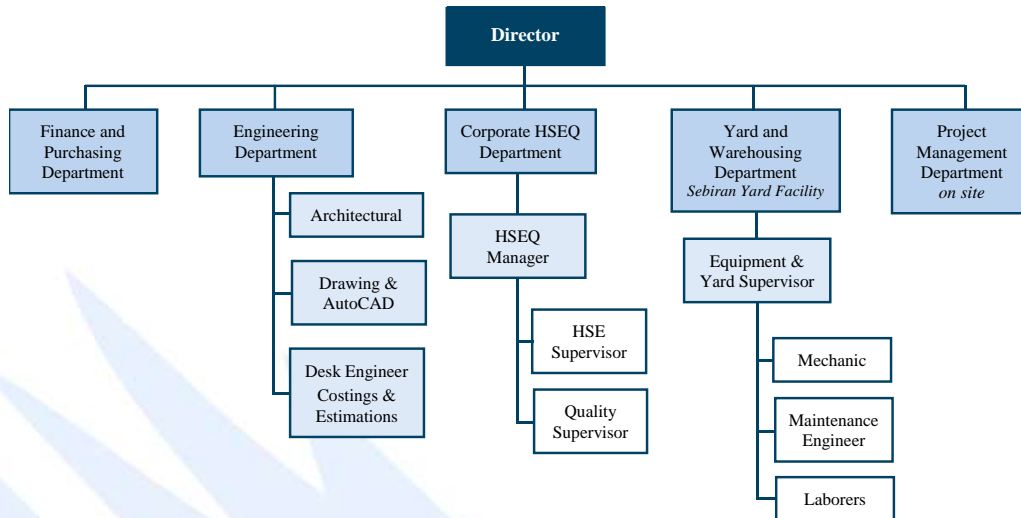

The Falcon Construction pledge is to uphold the commitments of Falcon Group and deliver the highest quality of service not only to our corporate clients but also to the ultimate customer and end user – the Iraqi people.

As a multi-faceted group of companies, Falcon Group's mandate is to manage a critical mass of dynamic business ventures. Whether it is real estate, construction, security, oil and gas, agriculture or trading, Falcon Construction is committed to delivering world-class services here in Iraq.

CAPABILITIES

Falcon Construction is a world-class construction and project management company that aims to build and develop real estate projects in Iraq to the best international standards. Both an international and local team of experts are staffed full-time to support Falcon Construction's clients.

The company's major projects and long list of satisfied clients speak for Falcon Construction's capabilities. Empire World, founded in 2007, is Falcon Group's highly regarded real estate property and prime construction project. The 2.7 Billion US Dollar Empire World development spans a land area of 750,000 m² and is strategically located 10 minutes away from the city center, the Citadel, and the Erbil International Airport. The project area encompasses:

- Marriott Hotel and Executive Apartments
- Empire Business Towers
- Empire Business Complex
- Empire Royal Villas
- Empire Residential Wings
- Empire Diamond Towers
- Empire Pearl Towers
- Empire Speed Center
- Service Facilities

QUALIFICATIONS

Chapuk Shafeeq Abdullah

Falcon Construction Chief Engineer

Mr. Abdullah has over 35 years of experience in management and executive roles for Falcon Construction, including his current position of Chief Engineer for the company. He has served as Senior Civil Engineer and is extremely knowledgeable in engineering and support services requirements on projects in Iraq and internationally.

RELEVANT EXPERIENCE

UN World Health Organization; Erbil, Iraq, Senior Civil

Engineer. Mr. Abdullah served as Senior Civil Engineer on a rehabilitation unit for the UN World Health Organization, where his responsibilities included the renovation and extension of hospitals. He also participated in the supervision and quality control of all WHO projects inside Erbil City. He checked bills of quantities for the extension parts of hospitals, and visited sites every day to monitor projects run by site engineers. He prepared weekly reports on all projects inside Erbil, and he checked measurements of different items for the first and final payments on the project. He created site designs using AutoCAD and floor plan software for the project.

Ministry of Work; Erbil, Iraq, Directorate of Work. Mr. Abdullah served under the Erbil Ministry of Work where his responsibilities included working with technical department as Head of Engineers. He prepared annual plans, as well as prepared and delivered monthly reports to the Ministry of Work. He monitored projects run by site engineers and checked bills of quantities prepared by engineers. During this time, he also created design plans for new projects.

Senior Civil Engineer; Baghdad, Ministry of Housing & Construction. Mr. Abdullah served as Senior Civil Engineer for Mansor Contracting Company during this time, where he implemented 600 houses in Baiji City (Salahaddin Governorate) for an oil refinery. He also served as Assistant Project Manager for implementing an antibiotic plan in AL Suwaira – Baghdad.

Assistant Manager, Senior Civil Engineer; Baghdad, Ministry of Housing & Construction. Mr. Abdullah worked under the State Organization of Building and the Directorate of Building in Baghdad and Erbil, where he was assistant manager for implementing dormitory buildings for a medical institute in Erbil. He also served as Resident Engineer for Iraqi National Astronomical Observatory project on Korek Mountain in Erbil. He was a Civil Engineer for the Building of Midi cent College under a German owned company, and worked as Civil Engineer for the University of Sallahadin construction.

Darbaz Mohammed-Fadhil Jalil, PMP

Project Engineer

Mr. Jalil is a trained management professional, will nearly 30 years in construction and support service experience. He has specialized in project management and resource mobilization, and he possesses coordination, communication, and negotiation skills. He possesses the ability to meet tight schedules under stressful environments and varied cultural contexts, and he has demonstrated client trust and confidence with his problem-solving approaches. He possesses the knowledge and capacity to manage project documentation to professional and field standards.

RELEVANT EXPERIENCE

United Nations; Erbil, Iraq, Project Officer. Mr. Jalil served in a position of Project Management, where his responsibilities included providing planning schedules, budgeting schedules, implementation guidance, staffing, organizing administrative support, maintaining close communications, and ensuring adequate reporting for monitoring and quality control. He performed follow-up on the implementation processes, ensuring the timely and transparent manner for achieving all project objectives, all in accordance with UN-HABITAT Standard Operating Procedures and mandates. He managed, supervised, and controlled project expenditures in close coordination with Procurement and Finance Units, and he managed, coordinated, and provided guidance to team leaders/field engineers who were scattered in about ten governorates of Iraq at the same period by following up with their daily activities with contact and weekly reports. He actively participated in recruiting new staff, including preparing Terms of Reference, conducting interviews, scoring evaluations, and conducting briefings and orientation meetings. He identified and established relations with national and international networks that provided technical and advisory support for project implementation, and he established and coordinated field-based monitoring and evaluation systems for all project activities. He prepared regular project progress reports against set targets and indicators, with evidence based analysis for planned outputs progress in accordance with set schedules, budgets, and inputs provided by the project. Projects for the UN during this time included work under the IPSM Programme (Iraq Public Sector Modernization).

United Nations; Amman, Jordan, Project Manager. Mr. Jalil managed a number of construction projects remotely in different governorates in Iraq, such as the construction of 300 low cost houses for Internally Displaced Persons (IDPs) and Returnees in Erbil, Babel, Wasit, and Thi. As an acting project manager for the implementation of the houses, he provided technical/engineering and managerial guidance to national staff and consultants continuously to ensure quality and timely completion of projects within allocated budgets.
